

# FLAMMABLE CLADDING?

## HIGH-RISE BUILDINGS FIRE SAFETY SOLUTIONS

A fully compliant, cost effective alternative to Waking Watch

### Fully Compliant

Conforms to relevant  
NFCC guidelines

### Cost Effective

Government funding  
available

### Wireless

Enhanced coverage with  
minimal disruption

Our Intelligent Fire Detection solutions are fully compliant with the latest  
NFCC guidelines - [Click here for latest report](#)

## Choose the alternative solution

Government Waking Watch Relief Fund deadline extended to 30th June 2021

[click here for more information](#)

## Eligible for the fund?

You'll be eligible for the Government Waking Watch Relief fund if:

Your building is over 18 metres in height

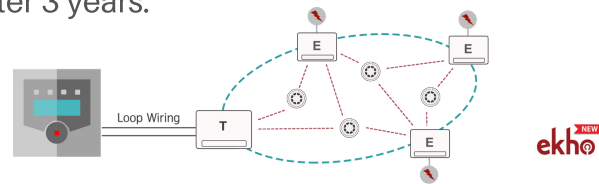

Your building has been found to have an unsafe cladding/fireproofing system

The leaseholders in your building have incurred costs towards a Waking Watch as an intermediary fire safety solution

## Cost effective and adaptable

Our Wireless Fire Alarm System Solutions can be installed quickly, with minimum disruption to residents, and provide early detection and warning of a fire condition.

Real world examples of wireless detection system vs Waking Watch show cost savings of +50% for Year 1 and +80% after 3 years.

Once flammable cladding is removed, the alarm system can be easily uninstalled, or alternatively left in situ and adapted and expanded to provide further protection.

## How we can help

Cornerstone Group can help you choose the correct intelligent detection solution for your building to ensure you are able to offer maximum protection to your residents.

We can demonstrate substantial cost savings for wireless detection system solutions when compared to Waking Watch building cover.

Leasing Options available - System installation without initial upfront investment.

Choose terms that fit your budget, with monthly repayments less than your current monthly Waking Watch costs!
